PROFILE

Enthusiastic Junior QA Engineer ready to catch bugs before your users do. Experienced in manual, API, and load/performance testing, with solid foundations in automation. Comfortable writing clean test cases, tracking bugs in Jira, testing endpoints with Postman, running database checks with SQL, and stress-testing apps with JMeter.

TECHNICAL SKILLS

- Manual Testing, Black-Box & White-Box techniques, Agile (Scrum/Kanban).
 - API and load testing like: Postman, Apache JMeter, REST API
 - Automation Basics like: Java, Selenium WebDriver, TestNG, Browser DevTools, Locator Strategies (XPath, CSS).
 - SQL, Jira, Trello, Git.
 - Basic iOS/Android app testing & UI responsiveness.
-

EDUCATION & TRAINING

Udemy Courses

- The Complete 2026 Software Testing Bootcamp by Tarek Roshdy (NezamAcademy)
- ISTQB Foundation Level (CTFL) V4.0 + Practice Exams (Passed 90%)
- Completed a project on locating elements and wrote web UI automation scripts using Java, Selenium WebDriver, and TestNG
- Built test suites and logged bugs in Jira while following full defect lifecycles.
- Created and ran REST API test collections in Postman to validate status codes, JSON responses, and headers.
- Created JMeter scripts to run load tests and evaluate system performance under traffic spikes.
- Executed SQL queries to verify backend data against frontend inputs.

Degree

- **National Academy of Security Service of Ukraine:**
 - Bachelor's Degree, Administration of Restricted Information Security
 - Magistre's Degree, Cybersecurity in IT and cyberspace (ongoing)
-
